👤 PROFILE   Agile Transformation | Project Management | Product Ownership | Product Management

I am a business savvy agile IT project management professional. My ability to bring clarity to ambiguity means I thrive in various business environments. I have a proven skill to take Scrum into effective use. Either from scratch or through transformation of ongoing projects.

My projects succeed without exception. I grasp complex dependencies quicky and easily define solid project and product MVPs with excellent stakeholder management. Facilitating workshops and owning the resulting the roadmap/action plan is familiar to me.
