English

## PROFILE

Johanna is an experienced project manager (20+ years) with a strong background in financial systems and international restructuring projects in financial services. She has led successful implementations, upgrades, and integrations of platforms like Oracle eBS and Basware TEM across multiple countries, including Finland, Sweden, Norway, Poland, and the UK. Her track record includes delivering complex projects on time and within budget. Johanna excels at coordinating cross-functional teams, translating business needs into effective technical solutions, and driving results in dynamic, multinational environments.

- Jira

### Other

- Basware TEM
- Basware P2P
- Nomentia Banking
- O365 Office Tools

## PROJECTS

---

### **Project Manager, Oracle eBS upgrade, Fortum Oyj, 2016**

The project scope was to upgrade Oracle eBS from version 11i to R12. The environment was in use for over 100 Fortum subsidiaries in the Nordics, Poland, Baltics and India with modules GL, FA, AP and AR.

- I acted as the project manager responsible for functional definitions and -testing
- My responsibilities included leading pre-study, forming the functional and testing team in Fortum side, arranging planning workshops, managing testing, planning trainings and reporting to steering group and stakeholders. I participated also in supplier selection for the project.
- The project was executed in planned time, budget and scope
- Project group consisted of dozens of Fortum employees from several countries and external consultants.
- I had similar role in previous upgrade to version 11i which took place in 2006

### **Project Manager, Implementing Basware TEM SaaS application, Fortum Oyj, 2022**

The project was to implement SaaS travel expense claim application for 1000+ users in 6 countries.

- As the Project Manager, I was involved with making contract with application supplier, responsible for forming the project group, managing travel rules' and integration definitions, testing, planning cutoff, budget monitoring, communications and reporting to steering group.
- The go-live went smoothly with the planned cutoff actions and trainings for users. Project kept the planned schedule and budget.
